

**Board of Architectural Review Monthly Report  
March 2020**

The Purcellville Board of Architectural Review at its regular meeting on March 17, 2020 approved an application for a new metal building for Ranger Glass, at 275 Shephardstown Court in the Industrial Park. The building features an office like appearance on the front façade with a large wall of glass windows anchoring the corner of the building. The rear and sides of the building, which cannot be seen from the street, are more industrial in character. The building contributes to the streetscape and is in keeping with the quality design of other recently constructed buildings within the Industrial Park.
